- Reservoir drain downs and de-chlorination
- Removal and replacement of stone from reservoirs
- Hatch, vent replacement/repairs work.

- Emptying and cleaning of chemical holding tanks
- Emptying and cleaning of chemical bunded areas
- Emergency spillage clean up

Routine Maintenance Services

Maximising Asset Performance utilising our Specialist Industrial Services and Environmental Services teams

Supporting the asset management, Future have developed a unique preventative maintenance service minimising the requirement for M&E intervention. Developed through key working relationships with both water companies and Tier 1 contractors.

- ▶ We have innovative ideas for dosing systems, RGF cleans, holding tanks, bunds and blind tanks, which would both improve asset performance and increase the useable lifespan before M&E interventions.
- ▶ We can support the works with our own assets including one of the largest waste tanker fleets in the UK, ADR glass lined tankers for ferric compounds, fully trained cleaning crews, jetting units from 1,000 to 15,000 PSI, torus tank spinning equipment, hot wash cleaning and in-house waste treatment facilities.

Services we offer to industry

Environmental Services

Request a brochure

- Future Waste Treatment Plants (ref: WTP)
- Future Waste Transfer Stations (ref: WTS)
- Hazardous Waste Containers (ref: HW)
- Oil Waste Management, Recovery & Recycling (ref: OWM)
