

CONSTRUCTION WASTE TREATMENT & DISPOSAL

AUGEAN IS LEADING
THE WAY THROUGH
**COMPLIANCE
DRIVEN SERVICES
& FACILITIES**
FOR THE UK'S
**INFRASTRUCTURE
AND CONSTRUCTION
SECTORS**

**Augean specialises in
managing hard to handle
wastes safely & compliantly.**

We have significant UK
waste treatment & disposal
infrastructure, and we
focus on delivering the best
environmental outcomes.

Augean provides waste management and specialist industrial services to a wide range of sectors including Energy from Waste and Biomass, Infrastructure and Construction, Nuclear and Radioactive, Processing and Manufacturing, and Oil and Gas.

For the UK's Infrastructure and Construction sectors, **Augean is a Trusted Partner**, evidenced by **Augean** being the UK's market leader in the volume of hazardous soils handled.

The quality of our service and infrastructure, and the range and quantities of wastes we treat under our **Environmental Permits**, are valued by our customers.

Additionally, our **Industrial Services** team provides specialist cleaning activities across the construction, commercial and industrial sectors.

We support our Communities with projects via the Landfill Communities Fund, and also through initiatives such as local litter picks, environmental programmes and contributions to food banks.

“ **Augean, earning trust & creating positive legacy for all our stakeholders is at our heart.** ”

CONTINUING TO DELIVER THE **HIGHEST LEVEL OF SERVICE** TO OUR CUSTOMERS WHILST **RESPECTING THE BEST STANDARDS OF HEALTH & SAFETY AND COMPLIANCE**

KEY FACTS

In 2021, data from Regulatory Authorities showed that in the UK there was 939,000 tonnes of hazardous soil and related wastes, of which 67% was classified under European Waste Classification (EWC) Code 17 05 03* (soil and stones containing hazardous substances) and 20% was classified under EWC Code 17 06 05* (construction materials containing asbestos).

WHY USE AUGEAN TO MANAGE YOUR HARD TO HANDLE WASTES?

- + We are strong on health, safety and environmental compliance
- + Our permitted and operational capacity & capability
- + The quality of our infrastructure
- + We focus on best environmental outcomes based on the waste hierarchy
- + We're flexible and reliable
- + We're proactive and responsive
- + Our track record

From your initial enquiry our team will be there to guide you through the process of safely and compliantly dealing with your hard to handle wastes.

Our technical team will review your enquiry, understanding timing is crucial to keep your project moving. Through our UKAS accredited laboratory we are able to offer testing support and find solutions for your hard to handle wastes.

Our specialist soil treatment centres (STCs) and both non-hazardous and hazardous landfills afford us a one-stop-shop to manage your hard to handle wastes.

Once your project is under way, our customer service team ensure your compliance paperwork meets regulatory standards and full reporting will be available.

All vehicles delivering wastes to our sites are weighed via our calibrated weighbridges.

Our range of treatment processes include bio-remediation, stabilisation and neutralisation.

We can also store and treat contaminated dredgings.

OUR CUSTOMERS VALUE FROM AUGEAN:

- + Our Professionalism
- + Our Facility Locations
- + Our Response Times
- + We understand our Customers' Needs
- + The High Quality of our Service

Dredgings Treatment / Disposal Methods

| BENEFITS | AUGEAN | SPREAD TO LAND | LANDFILL | SEA DISPOSAL |
|---------------------------------|--------|----------------|----------|-------------------------|
| Contaminated dredgings accepted | ✓ | ✗ | | Subject to CEFAS Limits |
| Available all year round | ✓ | ✗ | | ✗ |
| Can be taken wet | ✓ | | ✗ | |
| Can be actioned quickly | ✓ | ✗ | ✗ | ✗ |
| No further consents required | ✓ | ✗ | ✗ | ✗ |

“ Defining the future of managing ‘hard to handle waste’, driven by an unrivalled passion and expertise in our people. ”

CONSTRUCTION WASTE STREAMS

Augean operate two STCs at Port Clarence in Teesside and ENRMF near Peterborough. Our STCs are able to treat a range of hazardous soils contaminated with for example, metal substances, asbestos, hydrocarbons and high ph.

In addition to construction materials our STCs are equipped to treat the hard to handle wastes from process and industry, such as filtercakes, gasholder sludges and other highly contaminated oily wastes.

Underpinning Augean's treatment processes, is Augean's permitted hazardous waste and non-hazardous waste landfills. Augean has around 40% of the UK's permitted hazardous waste void.

LOGISTICS SUPPLY CHAIN

Augean has a robust supply chain of audited haulage suppliers, providing full logistic support to our customers.

Our account managers will take away the burden of logistics and provide detailed reporting to help you manage your project. Coupled with our large treatment capacity, no job is too big or small.

Augean follows the waste hierarchy when assessing waste treatment solutions for:

- + Hydrocarbon contaminated soils
- + Metals contaminated soils
- + Asbestos and asbestos contaminated soils
- + Filter cakes and sludges
- + PFAS contaminated soils
- + Road plainings
- + Contaminated dredgings

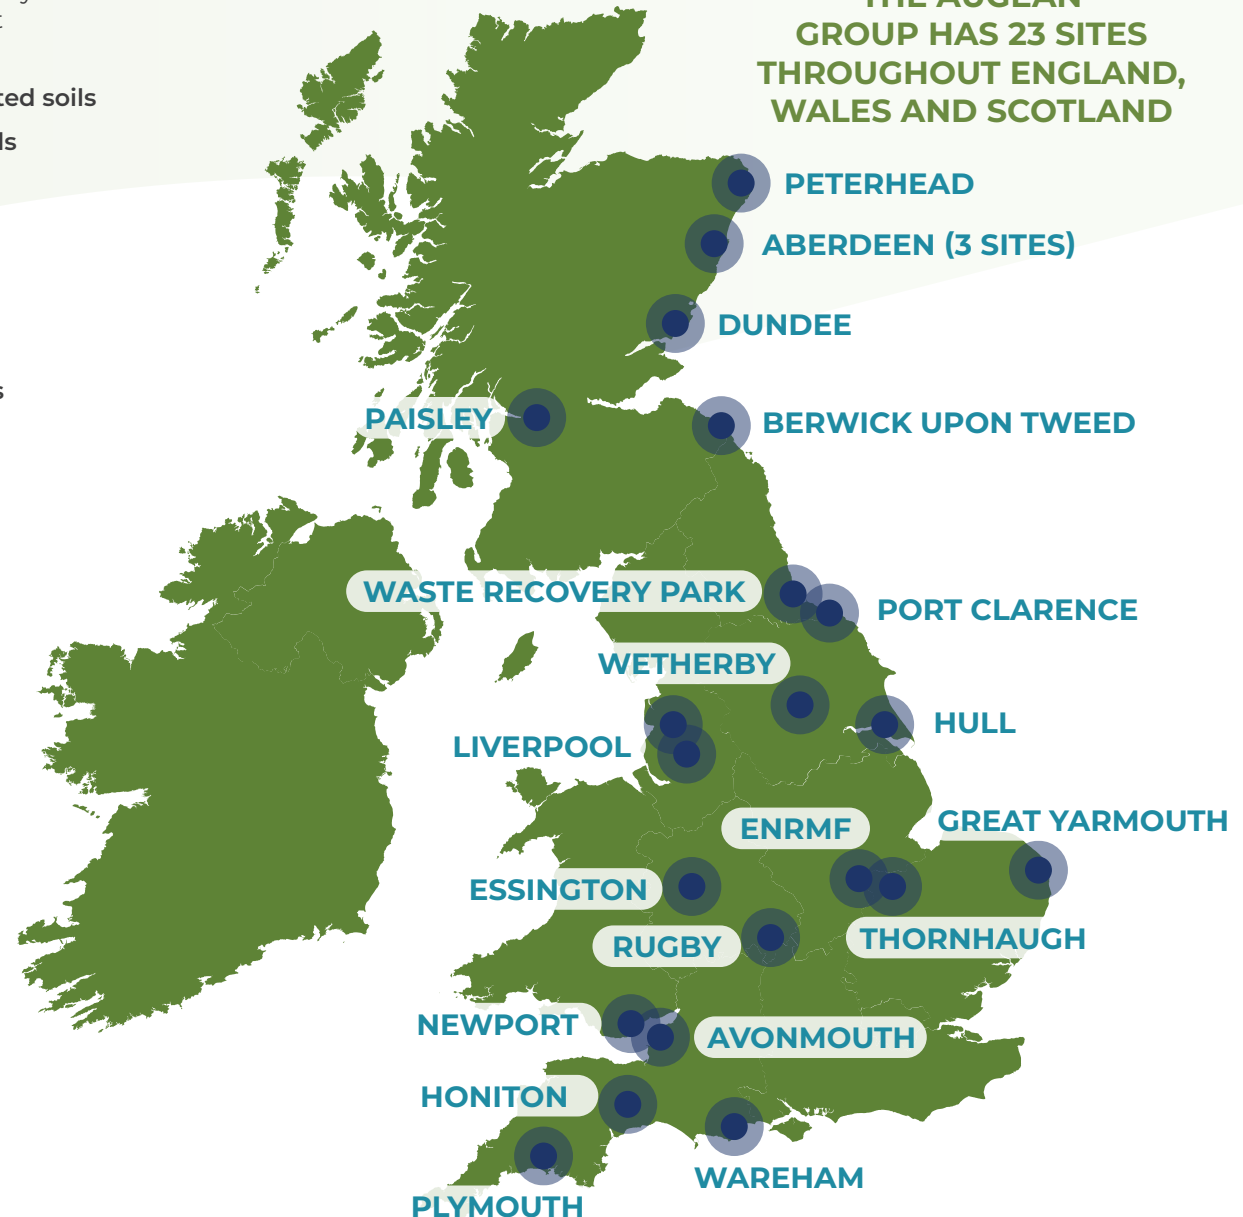

TYPES OF PROJECTS WE SERVE:

- + National infrastructure projects such as HS2
- + Regional infrastructure such as Teesport
- + Local construction projects such as site decontamination

We accept a range of delivery HGV's including:

- + Rollon-off vehicles
- + Bulk tippers
- + Articulated bodied walking floor trailers

THE AUGEAN GROUP HAS 23 SITES THROUGHOUT ENGLAND, WALES AND SCOTLAND
